

FIRST AID AND WOUND

FIRST AID AND WOUND TREATMENT

This classification is by far the largest, and encompasses the greatest variety of drugs. There are products to stop bleeding, to disinfect wounds, and to promote healing. There are others to treat bloat, and those to treat constipation. There are speciality products to treat ringworm, and others for warts. There are also medications for pink eye, and even ketosis and lumpy jaw. First aid and wound treatment affects all livestock and therefore, this section is of value to everyone.
