

BIODINE DIN 00523720

For use as a detergent, sanitizer, and disinfectant for poultry farms.

Feeding, Watering Equipment & Crates:
Wash with water containing 0.6 ml of Biodine per litre of water. Rinse with clean water.

Poultry Drinking Water: Add 0.3 ml of Biodine per litre of water. Treated water should have an amber colour. Replace on fading.

Presentation/Packing:
4 Litre jug; 4 jugs/carton
20 Litre pail

DAIRY DINE DIN 00523712

For use as a detergent, sanitizer, and disinfectant for dairy farms.

Sanitizing with Dairy Dine: Add 0.6 ml of Dairy Dine to each litre of lukewarm water to aid in the prevention of the recontamination of sanitized equipment by contaminated rinse water and by the possible carry over of organic matter from the wash tank. Allow washed equipment to soak in rinse tank solution for at least 2 minutes. Before milking reassemble and flush machine with 0.6 ml Dairy Dine per litre of cold water.

Presentation/Packing:
4 Litre jug; 4 jugs/carton
