

IRON DEXTRAN INJECTION U.S.P.

DIN 00611891

Iron Dextran Injectable is a sterile solution containing 100 mg of elemental iron per cc., as ferric hydroxide in complex with a low molecular weight dextran fraction.

Contains 0.5% phenol as a preservative. Unopened packages are stable indefinitely at room temperature. Even though the iron content is high, viscosity (sticking syringe) is not a problem.

Presentation/Packing:

100 ml vial; 12 vials/carton; 48 /case

K3 VITE

DIN 00600539

K3 Vite is indicated in the prevention of prolonged bleeding in chickens and turkeys due to cannibalism and hemorrhagic syndrome. It is also effective in cases of vitamin K deficiency in feed.

Presentation/Packing:

100 gram pack; 50 packs/carton
